Introduction

Agribusiness management exposes students to concepts in agribusinesses, management and theories and functions of management. Students are also trained to acquire skills in production and operations systems in Agri business management, marketing, managing human resources and financial management in Agri business. The programme is quantitative in areas of economics, quantitative methods, statistics, operation research, macro and micro economics.

History

BSc in Agribusiness was presented to Faculty of Agriculture in 2004 and to senate in 2005. It is currently being revised. The program is becoming increasingly popular.

Agribusiness Management Head

Name/Photo
