

# SEPTEMBER 2025 ADMISSION APPLICATIONS NOW OPEN FOR MASTER OF SCIENCE IN SUSTAINABLE MANAGEMENT AND OPERATIONS (SuMO)

**University of Nairobi | Faculty of Agriculture | Department of Agricultural Economics**

---

Are you ready to become a leader in sustainability management? The Master of Science in Sustainable Management and Operations (SuMO) is your gateway to addressing the world's most pressing sustainability challenges.

SuMO is a globally recognized program developed in collaboration with Kühne Logistics University (Germany), University of Dar es Salaam (Tanzania), and the Kühne Foundation. It is funded by DAAD with funds from the Federal Foreign Office (AA) of Germany. The program aligns with the current demands for sustainable operations.

## **Course structure**

- Duration: 2 years (180 ECTS credits)
- Structure: 12 coursework modules (Year 1) + Research Thesis (Year 2)
- Flexible learning modes: Full-Time regular weekday classes and or blended Learning involving classroom and online learning
- Interactive learning approach: Case studies, field visits, group projects and guest speakers from industry and partner universities

## **Career opportunities**

SuMO offer diverse high-demand career paths including Sustainability Managers & ESG Analysts, Sustainable Supply Chain & Operations Officers, Environmental and Social Impact Consultants, Climate and Sustainability Policy Analysts, Program Officers in NGOs and development agencies, Green entrepreneurs and innovators, Academics and researchers in sustainability, among others.

## **Admission requirements**

- i. Holders of 1st or 2nd Class Honors degrees from the University of Nairobi or equivalent institutions in fields related to agribusiness, business, social sciences, or natural sciences
- ii. Bachelor's degree holders in areas such as Agribusiness Management, Agricultural Economics, Agricultural Sciences, or related business disciplines with at least Upper Second Class Honors.
